WORK EXPERIENCE

Associate Technical Lead
Gapstars/Learned   Sep 2023 - Present

- Transform designed layouts to pixel perfect user interfaces and implement functionalities to bring interfaces to life.
- Participate and practice agile principles to maintain the product roadmap to achieve the deadlines.
- Contribute on code reviews to maintain the company standards and code quality by sharing the knowledge with colleagues.
- Implemented and maintained the storybook to share reusable components within the application.
- Successfully released Learned 3.0 version on December 2023, where 200+ companies use this platform to collect data and improve their employees.
- Quickly adapted to the existing structure and the architecture to successfully work on the backend tasks as well even though my expertise lies on frontend development.

Tech stack- JavaScript, TypeScript, React, Node, Storybook, GitLab, GCP
